# Conquer the dysfunction!

Just starting your kitchen renovation journey? Creating your dream kitchen is exciting yet can be overwhelming at the same time with all the decisions you need to make. It would really help to have a hand to hold through the process, right? Well, good news - the professional Kitchen Designers at The Home Depot will be with you every step of the way.

Cooking as a family every night in this tiny dated kitchen meant everyone was under foot and the fridge door created a barrier. Their reno journey started by knocking down the dining room wall to create a large U-shaped kitchen with an island that doubles as a farmhouse table.

Knowing how you want your kitchen to function is just as important as how you want it to look. The key is identifying what makes the most sense for the way you cook, gather and live in your space. Thomasville's extensive line of Performa™ organizational solutions is designed to meet your personal lifestyle needs.
